## **Women's Day Celebration-2023**

International Women's Day is on March 08<sup>th</sup> of every year. It is an annual event where people across the globe celebrate women's achievements, raise awareness about gender discrimination and take action to drive gender parity. The success of every woman should be the inspiration to another. We should raise each other up. Make sure you're very courageous: be strong, be extremely kind, and above all be humble.

**LAMP LIGHTENING CEREMONT BY CHIEF GUEST**

**Sree Sakthi Engineering College**

19m · 🌐

Vriksham: Women's Day Celebration-Lamp  
Lightning Ceremony.

**MRS. KAVITHA JENARTHANAN, MOTIVATIONAL SPEAKER**

She mainly discussed about the freedom of women. Women are change makers, but somehow, we lose our humor and capacity to enchant. Let's get back to just being who we are best... women!

Instead of trying to convince someone you fit within their world, build your own. Don't chase people. Chase your curiosity, and track your development and potential. Build a world you want to be in and attract the right people to it.

Be Careless, laugh more, enjoy more, and be the fantastic advisor, supporter, cheerleader, and woman you have always been made to be. If others do not accept who you are and accept your talents, please do not be discouraged. By just being and enjoying, you make the most impact because then you handle situations, and situations don't get you down.

Don't worry about the mistakes you made. Just make sure they make you wiser. Grow through what you go through Life is simple! Get out of your head and get into the moment. The goal of life is to die young but as late as possible.

**MRS. ANNAM, INSPECTOR-AWPS: THUDIYALUR**

She discussed about the potential of women. we are celebrating the women who have inspired us over the decades and changed our world for the better. Let us become the first generation that decides to be the last that sees empty classrooms, lost childhoods and wasted potentials. Let this be the last time that a girl or a boy spends their childhood in a factory. Let this be the last time that a girl is forced into early child marriage. Whatever you choose, however many roads you travel, I hope that you choose not to be a lady.

I hope you will find some way to break the rules and make a little trouble out there. And I also hope that you will choose to make some of that trouble on behalf of women.

**MS.SATHYA, DISTRICT EMPLOYMENT OFFICER**

She mainly discussed about the importance of education for woman. Education is very important tool for everyone to succeed in life and get something different. It helps a lot in lessening the challenges of life difficult life. Knowledge gained throughout the education period enables each and every individual confident about their life. It is a necessity that helps us to grow as individuals and become better citizens. It is also an important tool that helps us to acquire new skills and knowledge. Education is the key to success in life. It is also the best way to reduce poverty and crime. It helps us to become more responsible and mature. It also helps us to become more aware of our surroundings and the people around us.

**DR.KALA MAHESWARAN, ANEASTHESIOLOGIST**

She discussed about women empowerment. The word ‘Women Empowerment’ itself implies that women are not powerful enough - they need to be empowered. This painful truth has been in existence for a long time. It is in recent years that noticeable work started beginning to lift women out of the abyss of insignificance and powerlessness. The patriarchal society suppressed women’s freedom across the world. Women were not allowed to vote or even put forward any opinion. Women were confined to their homes. As time progressed, they realised that their life meant much more than just serving in the household. As more and more women started crossing the man-made barriers, the world began to witness the rise of women. Unlike men, women never try to stifle the voice of their opposite gender. They hold the hands of all the downtrodden people men and women both and they pull them out of misfortune as they try to improve their lives

## MRS.MADHANIGA, YOGA INSTRUCTOR

She has educated us about the importance of health. The woman is the heart of the family, and women are the heart of the system. Having a healthy woman in our family is essential to having a healthy nation. There are some, who frown upon women's health care. Is it true that women need specialized health care? This may be a question sometimes. The question of whether specialized healthcare should be available exclusively for women is frequently brought up. A **woman's health** issues and conditions are unique, ranging from menopause and pregnancy to gynecological conditions like fibroids and endometriosis. We all have learned that health is a state of being free from diseases. It is fine to believe that one is healthy because he or she is not ill. Although one cannot honestly claim to be healthy simply because there is no apparent illness, thinking that way is completely false. In reality, health means feeling well enough to function physically, mentally, and socially. Happiness is essential for true health.
