Well planned teaching learning process and the methodology is followed for effective run of the institution. As per the guidelines of IQAC there is a well planned structure to review the teaching learning process. The following are the various teaching learning processes,

- 1. Subject allocation**
- 2. Preparation for Academic lesson plan**
- 3. Preparation of Class notes**
- 4. Class Committee meetings**
- 5. Tutor ward meeting etc**

Subject allocation

At the starting of the new semester, subject priority will be taken from all faculties which they want to teach in new semester. In first phase, faculty has to give priority rank from one to three from all subjects of each semester for both theory and Lab.

Student feedback for faculty over a subject will be an essential thing in deciding whether the subject will allocate or not to that particular faculty. In case of new introduced subject, the system will check the faculty's technical profile and subject profile before allocating subject. If institute follow rotation policy, then system will not allocation any subject to faculty more than three times in continuation. In case multiple faculty assigned for same subject, then system will consider the wish list taken prior from Principal/HOD. Subject credit, no of division/batch/student for a semester also analyze by the system to decide no of faculty required for subject.

Preparation for Academic lesson plan

Academic lesson plan is the faculty's road map of what students need to learn and how it will be done effectively during the class time. Then, faculty designs appropriate learning activities and develops strategies to obtain feedback on student learning. Having a carefully constructed lesson plan for each hour lesson allows faculty to enter the classroom with more confidence and maximizes their chance of having a meaningful learning experience with their students.

Preparation of Class notes

Faculties prepare class notes with effective visuals, analogies, demonstrations, and examples to reinforce the main points.

Class Committee meetings

A class committee consists of the HoD, the Faculty Advisor of a class, concerned subject faculties and the students' representatives of the class. Class committees shall have three meetings in a semester; the meetings shall be called by the Faculty Advisor.

The purpose of a Class Committee is

- To convey the feedback of teachers regarding the class, attendance and to set their expectations for students
- To enable students to provide feedback regarding the teaching- learning process, internal assessments, co-/ extra-curricular activities, student support services, mentoring, etc

Tutor ward meeting

- For all students, Tutor Ward meeting is conducted to give their reviews to their responsible tutors in order to solve the issues faced by them.
- The meeting deliberately helps every single student of the class acknowledged by the tutors to understand their students and also to improve his reasoning skills
- Meeting enables people to agree to the facts that makes an individual development

The faculty plan each of these activities and it is reviewed thoroughly by HOD before implementation. Once the activity are implemented their progress is monitored and outcomes are analyzed through IQAC and discussed with the concern faculty and class advisor for the improvements. All academics and other activities at institutional level are planned and monitored by IQAC. The quality of course delivery process and attainment of outcomes are reviewed by this cell. The process for providing skill and knowledge beyond the syllabus in attaining PO, PEO, PSO through CO are also reviewed by this cell.

Final year project plays a vital role for completing their graduation. Students in eighth semester pursue a group based project on problem of their choice in their relevant discipline as per the guidelines of Anna University. Project work is carried out with the guidance of project guide allotted to them for understanding and execution of the project. Final year students are divided in to project groups as 3 or 4 students in a batch.

The members in the review panel will give their ideas to enhance the quality of the project. They allot marks for various aspects according to their performance .These aspects are different for every review. Three project reviews are scheduled at the beginning of the semester and it is intimated to the students every month and marks are awarded and displayed to them.

At the end of third review the students are instructed to submit their project for demonstrations. Finally they appear for university examination with proper presentation using PPTs and demonstrate their project with relevant outputs.

The groups are motivated to publish their work in the reputed journal and National/International conferences. The students are motivated to display their Project work for Competitions. Final evaluation of the work is done during Anna University Examination at the end of the semester
