Well planned teaching learning process and the methodology is followed for effective run of the institution. As per the guidelines of IQAC there is a well planned structure to review the teaching learning process. The following are the various teaching learning processes,

1. Subject allocation
2. Preparation for Academic lesson plan
3. Preparation of Class notes
4. Class Committee meetings
5. Tutor ward meeting etc

Subject allocation

At the starting of the new semester, subject priority will be taken from all faculties which they want to teach in new semester. In first phase, faculty has to give priority rank from one to three from all subjects of each semester for both theory and Lab.

Student feedback for faculty over a subject will be an essential thing in deciding whether the subject will allocate or not to that particular faculty. In case of new introduced subject, the system will check the faculty's technical profile and subject profile before allocating subject. If institute follow rotation policy, then system will not allocation any subject to faculty more than three times in continuation. In case multiple faculty assigned for same subject, then system will consider the wish list taken prior from Principal/HOD. Subject credit, no of division/batch/student for a semester also analyze by the system to decide no of faculty required for subject.

Preparation for Academic lesson plan

Academic lesson plan is the faculty's road map of what students need to learn and how it will be done effectively during the class time. Then, faculty designs appropriate learning activities and develops strategies to obtain feedback on student learning. Having a carefully constructed lesson plan for each hour lesson allows faculty to enter the classroom with more confidence and maximizes their chance of having a meaningful learning experience with their students.

Preparation of Class notes

Faculties prepare class notes with effective visuals, analogies, demonstrations, and examples to reinforce the main points.

Class Committee meetings

A class committee consists of the HoD, the Faculty Advisor of a class, concerned subject faculties and the students' representatives of the class. Class committees shall have three meetings in a semester, the meetings shall be called by the Faculty Advisor.

The purpose of a Class Committee is

- To convey the feedback of teachers regarding the class, attendance and to set their expectations for students
- To enable students to provide feedback regarding the teaching-learning process, internal assessments, co-/ extra-curricular activities, student support services, mentoring, etc

Tutor ward meeting

- For all students, Tutor Ward meeting is conducted to give their reviews to their responsible tutors in order to solve the issues faced by them.
- The meeting deliberately helps every single student of the class acknowledged by the tutors to understand their students and also to improve his reasoning skills
- Meeting enables people to agree to the facts that makes an individual development

The faculty plan each of these activities and it is reviewed thoroughly by HOD before implementation. Once the activities are implemented their progress is monitored and outcomes are analyzed through IQAC and discussed with the concerned faculty and class advisor for the improvements. All academics and other activities at institutional level are planned and monitored by IQAC. The quality of course delivery process and attainment of outcomes are reviewed by this cell. The process for providing skill and knowledge beyond the syllabus in attaining PO, PEO, PSO through CO are also reviewed by this cell.

Final year project plays a vital role for completing their graduation. Students in eighth semester pursue a group based project on a problem of their choice in their relevant discipline as per the guidelines of Anna University. Project work is carried out with the guidance of project guide allotted to them for understanding and execution of the project. Final year students are divided into project groups as 3 or 4 students in a batch.

The project coordinator will allot the guide to every group through specialization study in PG .The students then submit their domain preference and gets approval from the guide and HOD. Project reviews are conducted on monthly basis to track the performance.

Three project reviews are conducted during the last two semesters in final year. During eighth semester, project review panel for each department is constituted and panel members are conducting project reviews for three times for each and every batch every month. The members in the review panel will give their ideas to enhance the quality of the project. They allot marks for various aspects according to their performance .These aspects are different for every review. Three project reviews are scheduled at the beginning of the semester and it is intimated to the students every month and marks are awarded and displayed to them.

At the end of third review the students are instructed to submit their project for demonstrations. Finally they appear for university examination with proper presentation using PPTs and demonstrate their project with relevant outputs.

The groups are motivated to publish their work in the reputed journal and National/International conferences. The students are motivated to display their Project work for Competitions. Final evaluation of the work is done during Anna University Examination at the end of the semester.

Benefits of the project work:

- Develop real time or social relevance projects
- Helps Students Develop Skills for Living in a Knowledge- Based, Highly Technological Society by Project-Based Learning
- Establish Confidence for Initiating start ups
- Solving highly complex problems requires that students have both fundamental skills and 21st century skills such as teamwork, problem solving, research gathering, time management, information synthesizing, utilizing high tech tools are developed.

With this combination of skills, students become entrepreneurs and skilled engineers of their learning process, guided and mentored by their project guides.

MODEL BASED EDUCATION

- SSEC'S new initiative to develop student's technical knowledge, new pattern for Internal Assessment is designed to match with industrial expectation and in this regard students are instructed to adhere to the norms strictly.
 - Model Based Examination 1- 04-01-2022
 - Model Based Examination 2- 05-01-2022

i) Model Based Exam MARK SPLIT UP:

S.NO	LEARNING OUTCOME OF PROJECT/MODEL BASED INTERNAL ASSESSMENT TEST	MARKS
1	Develop a human-centric mindset while designing, innovating, developing, and testing solutions for new products, services and processes.	10
2	Understand the role of innovation in the digital era and drive disruptive innovation.	10
3	Create a design thinking culture to drive innovation in an organizational setup.	5
4	Envisage innovative solutions individually and in teams for maximizing business impact.	15
5	Develop the ability to create and test prototypes that are customer-centric and innovative.	10
TOTAL MARKS		50

CIRCULAR

MODEL THEORY EXAMINATION

The HODs are informed to note the Model Theory Examination schedule for 2021-2022 (Even Semester).

Model Theory Examinations-13.06.2022 TO 18.06.2022 - II & III Year

II Internal Assessment Test -13.06.2022 TO 18.06.2022 - I Year

HODs and internal test coordinators are requested to make necessary arrangements to conduct the same. Submit Question Paper copies to Exam Cell within 10.06.2022.

SREE SAKTHI ENGINEERING COLLEGE

(Accredited by NAAC, Approved by AICTE & Affiliated to Anna University)

INTERNAL ASSESSMENT TEST- 2**The Course Outcomes (Cos) covered are:**

CO2,CO3 Upon completion of the course, students will be able to have clear understanding about Heat Treatment processes and Able to differentiate Ferrous And Non Ferrous Metals

Subject Code & Title :		ME8491 & ENGINEERING METALLURGY	
Branch :		Mechanical Engineering	Semester : IV
Date/Session/Duration:		12-05-2022 / AN / 3 Hrs	Max Marks: 100
Answer all the Questions			
PART A (10 x 2 = 20 Marks)			
1.	Define Heat Treatment Processes.		[CO2 K2]
2.	Write a short Note on Subcritical Annealing.		[CO2 K1]
3.	What do you understand by the term "Spheroidizing" ?		[CO2 K2]
4.	List out various Quenching Medium.		[CO2 K2]
5.	Define Marquenching.		[CO2 K1]
6.	What are the various alloys made up of copper		[CO3 K2]
7.	List out various factors affecting Hardness of materials		[CO3 K1]
8.	Define the terms AISI & HSLA.		[CO3 K2]
9.	What is meant by spheroidal Graphite Cast Iron?		[CO3 K2]
10.	List out applications of white cast iron		[CO3 K1]
PART B (5 x 13 = 65 Marks)			
11.	a) Explain Annealing process with its various types and neat sketch (OR) b) Briefly Quenching process with different stages and Real Time Application.		[CO2 K3] [CO2 K2]
12.	a) With help of a case study, explain the Significant contributions TTT Diagrams (OR) b) CCT- An important factor in Engineering Metallurgy. With help of real time example discuss and explain.		[CO2 K3] [CO2 K4]
13.	a) Describe in detail with neat sketch of Nitriding and Carbonitriding Process. (OR) b) In foundry industries, Flame Hardening and Induction hardening Processes plays a vital role- Discuss the important significance with real time example		[CO2 K3] [CO2 K4]
14.	a) Discuss various classification of steels with their characteristics and real time applications (OR) b) Briefly discuss In detail about the effect of alloying elements in steel.		[CO3 K3] [CO3 K2]
15.	a) List out various Stainless steels and explain its characteristic and applications (OR) b) Explain briefly the importance of Maraging Steels and Tool Steels in Current Engineering Industries with application oriented case study.		[CO3 K3] [CO3 K4]
PART C (1 x 15 = 15 Marks)			
16.	a) Bearings are heart of Engineering and Automotive Industries. With a real time case study briefly discuss various bearing alloy materials used and their characteristics. (OR) b) Copper is used in various electrical industries and other piping industries. With help of real time case study briefly discuss the importance of copper alloy in real world applications		[CO3 K4] [CO3 K2]

MODEL EXAMINATION

The Course Outcomes (Cos) covered are:

CO1, CO2, CO3, CO4, CO5	Upon completion of the course, students will be able to have clear understanding about Heat Treatment processes and Able to Classify the material, properties and their real time applications.
-------------------------	---

Subject Code & Title :		ME8491 & ENGINEERING METALLURGY	
Branch :		Mechanical Engineering	Semester : IV
Date/Session/Duration:		16-06-2022 / AN / 3 Hrs	Max Marks: 100
Answer all the Questions			
PART A (10 x 2 = 20 Marks)			
1.	What is peritectic Reaction? Write an example for that reaction.		[CO1 K2]
2.	State the condition for Gibb's phase rule.		[CO1 K1]
3.	Define recrystallization temperature and recrystallization.		[CO2 K2]
4.	What is Austempering?		[CO2 K2]
5.	List out some of the alpha and beta stabilizers.		[CO3 K1]
6.	State three characteristics of ferrous alloys that limit their utilization.		[CO3 K2]
7.	Explain condensation polymerization.		[CO4 K1]
8.	Differentiate Thermoplastic And Thermosetting Plastics		[CO4 K2]
9.	Define creep fracture.		[CO5 K2]
10.	Write the difference between Slip and Twinning.		[CO5 K1]
PART B (5 x 13 = 65 Marks)			
11.	a) Draw Iron - Carbide equilibrium diagram and mark on it all salient temperature and composition fields. (OR) b) Enumerate the properties and application of Gray C.I, Nodular C.I, White C.I, Malleable C.I		[CO2 K3] [CO2 K2]
12.	a) With help of a case study, explain the Significant contributions TTT Diagrams (OR) b) Explain the importance of heat treatment process with its different types.		[CO2 K3] [CO2 K4]
13.	a) Formulate the influence of alloying Al, Cr, Ni, Mo, Si, Mn, V & Cu in steel Explain in brief. (OR) b) i) Why copper is a suitable material for automobile radiators? Explain. (ii) What are the outstanding properties of cupronickel alloys?		[CO3 K3] [CO3 K4]
14.	a) What are the engineering ceramics and formulate the characteristic and classification of engineering ceramics . (OR) b) List the properties and assess the typical applications of the following thermoplastics [i] PTFE [ii] PPS [iii] PET [iv] PEEK		[CO4 K3] [CO4 K2]
15.	a) Explain briefly about charpy impact test? (OR) b) Explain the mechanism of plastic deformation of metals by slip and twinning?		[CO5 K3] [CO5 K4]
PART C (1 x 15 = 15 Marks)			
16.	a) Bearings are heart of Engineering and Automotive Industries. With a real time case study briefly discuss various bearing alloy materials used and their characteristics. (OR) b) Outline the principle of high frequency induction hardening. How induction Hardening is carried out. Mention its advantages, disadvantages and applications.		[CO3 K4] [CO3 K2]
